ABOUT ME

I am a frontend developer with a strong foundation in JavaScript, React, and web development technologies. I specialize in building responsive, user-friendly websites and dynamic web applications using modern frameworks and tools like Next.js, Redux, and SCSS. My goal is to create innovative and performant solutions, continuously improving as a developer in the ever-evolving tech landscape.

WORK EXPERIENCE

Gamepons   April 2022 – August 2022
Game Developer

- Designed and Developed game mechanics and UI with Godot Engine.
- Optimized performance for smooth gameplay.
- Collaborated with teams to ensure smooth development and engaging user experiences.

Self-study, Freelance   January 2023 – September 2024
Frontend Developer

- Design, develop, and optimize responsive web applications using React, JavaScript, and modern frontend technologies.
- Collaborate with clients to understand project requirements and deliver tailored solutions.

Self-Employed   February, 2025 – Present
Frontend Developer and Engineer

- Developed and designed a dynamic e-commerce website "Xstore "as my final project for Matrix Academy.
- Technologies used: React.js, SCSS, SupaBase and packages such as axios, AOS, Sweetalert2, Email.js and so on.
